Affirmation Cards 3 x 4 Clinical Practice Workbook

A clinically branded, function-preserving edition retaining the original exercises, psychoeducation, checklists, logs, planning tools, and response space.

DSM-5-TR · ICD-11 CLINICAL ALIGNMENT

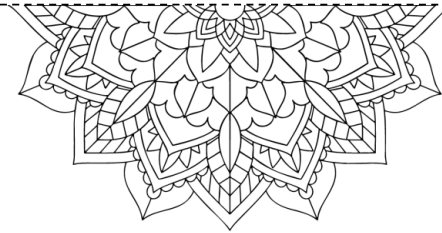

How to use this workbook

- Use this workbook selectively and collaboratively; it is educational and does not replace individualized assessment, diagnosis, treatment, medical care, or crisis services.
- Skip, pause, or modify any activity that increases distress, danger, shame, or loss of functioning. Adapt language for culture, disability, neurodivergence, health, resources, and lived context.
- Ratings in this workbook are reflection tools unless a named, validated measure and interpretation are explicitly provided.

**I HAVE THE
POWER TO
CONTROL
MY
THOUGHTS**

**I BREATHE
DEEPLY
AND
I AM
CALM**

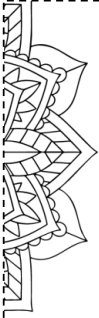

**I AM
THE
ARCHITECT
OF MY
LIFE**

**I CAN
HANDLE
WHATEVER
COMES MY
WAY**

**I AM
STRONG
AND
CAPABLE**

**I'M
DOING
THE BEST I
CAN AND
THAT'S
GOOD
ENOUGH**

**I AM
GENTLE,
KIND,
AND
PATIENT
WITH
MYSELF**

**I
DESERVE
ALL
THAT IS
GOOD**

2026 Clinical Alignment

DSM-5-TR (including Sept. 2025 update) · ICD-11 CDDR / 2026 MMS

Classification status

- DSM-5-TR: No standalone DSM-5-TR diagnosis under the workbook title · educational/contextual topic unless a separately assessed disorder applies
- ICD-11 CDDR: No dedicated ICD-11 CDDR mental-disorder code under the workbook title · educational/contextual topic unless another coded condition is established
- This workbook is non-diagnostic. A title, checklist, or completed activity never establishes a diagnosis.

Pages requiring the updated interpretation

- The audit identified source pages 2. The statements below supersede incompatible diagnostic, scoring, safety, or resource wording on those pages.

Diagnostic and differential limits

- Use Affirmation Cards material to support assessment or intervention planning, not to assign a diagnosis. Evaluate duration, severity, clinically significant distress or impairment, developmental and cultural context, medical/substance causes, exclusions, and relevant differentials.

Document-specific corrections

- Keep Affirmation Cards explicitly non-diagnostic; its exercises organize experience and goals but do not establish a mental disorder or causal explanation.
- Supersede diagnostic-sounding scoring on pages [2]: disclose whether each tool is validated or author-created, remove unsupported thresholds, and separate symptom monitoring from diagnosis.
- Replace crisis wording on pages [2] with the current U.S. 988 call/text/chat pathway, 911 or nearest emergency department for immediate danger/medical emergency, and a direction to use verified local services outside the United States.

Measures, scoring, and permissions

- Pages [2] contain named, implied, or author-created screening/rating content . These scores are not diagnostic unless the exact instrument, version, validation population, administration, and interpretation are established. Identify provenance for every item set and scoring rule. Obtain publisher permission/license when required; otherwise remove cutoffs and label it as a nonvalidated reflection checklist, or replace it with a properly licensed measure without altering its wording/scoring.

Intervention scope and contraindications

- Use Affirmation Cards activities as psychoeducation and structured reflection, not diagnosis or a stand-alone treatment plan. Adapt or stop any exercise that worsens distress, functioning, conflict, pain, or dissociation, and escalate care according to the actual presentation.

Crisis and current resources

- For Affirmation Cards, use: · If there is immediate danger or a medical emergency, call 911 or go to the nearest emergency department. In the U.S., call or text 988 or use 988lifeline.org for 24/7 crisis support. Outside the U.S., use verified local emergency and crisis services. · Verify all topic-specific agencies and links at publication.
